

Fighting water-borne disease with the

Aquatainer

NRS Relief's Aquatainers

are at the heart of fighting this disease and offer safe storage of treated water

Cholera

is a diarrhoeal disease that can kill within hours

- Caused by drinking polluted water
- Symptoms: Diarrhoea, nausea, dehydration, muscle cramps, shock

Happening now: The world's worst outbreak is in **Yemen**

5,000
new infections each day

368,207
suspected infections, 40% of which are children

The situation is made worse because:

14.5
million lack access to clean water or adequate healthcare

274
medical facilities destroyed by fighting

1 Make the water clean by:

Boiling

Filtering

Adding bleach

2 Store the water safely in an Aquatainer:

Hygienic

Impact resistant

Child friendly

With/without spigot

3 Use safe water for:

Drinking

Cooking

Personal hygiene

Cleaning teeth
